PROFILE SUMMARY

Aspiring Java Full Stack Developer with hands-on experience in developing web applications using Java, Spring Boot, React.js, MySQL, HTML, CSS, and JavaScript. Strong foundation in OOP, Data Structures, Algorithms, and DBMS. Capable of building end-to-end applications, integrating APIs, and creating responsive user interfaces. Seeking an opportunity to contribute technical skills and grow as a software development professional.

SKILLS

- Programming: Java, Data Structures (Arrays, LinkedList, Stack, Queue)
- Frontend: HTML, CSS, JavaScript, React JS, jQuery, Bootstrap
- Database & Framework: MySQL, Spring boot, DBMS, REST API
- Concepts: Object-Oriented Programming (OOPs), SDLC, Agile Methodology, JPA, 3-Tier Architecture, CI/CD, Servlet, Spring MVC, Java 8, JDBC
- Soft Skills: Problem Solving, Debugging, Team Collaboration, Analytical Thinking, Troubleshooting
- Tools: Eclipse, VS Code, Git, GitHub, Maven, AI-assisted development tools, Postman

PROJECTS

ATS-FRIENDLY RESUME CHECKER (Oct 2025):

- Built a Java desktop app that extracts text from PDF resumes using Apache PDF Box and matches keywords against job-specific skill sets stored in a MySQL database via JDBC.
- Implemented an ATS scoring algorithm that calculates keyword match percentages and highlights missing skills, helping users optimize resumes for specific job roles.

ONLINE COURSE ENROLLMENT SYSTEM (Nov 2025):

- Developed a Java web application for course registration with user authentication, course listing, and enrolment tracking using core Java and OOP principles.
- Designed a modular MVC-style architecture separating business logic, data access, and UI layers for improved maintainability and scalability.

NETFLIX CLONE – STREAMING PLATFORM UI (Dec 2025):

- Developed a Netflix-inspired streaming UI with responsive layouts using CSS Flexbox and Grid, ensuring seamless rendering across mobile and desktop devices.
- Implemented dynamic content browsing and a real-time search interface using vanilla JavaScript with DOM manipulation and adaptive UX design principles.

INSTAGRAM CLONE (Feb 2026):

- Developed a front-end Instagram clone using React JS to understand component-based architecture, state management, routing, and responsive design. The project enhanced my skills in React Hooks, API integration, and real-world UI development.
- Technology used in this project include React JS, JavaScript, Bootstrap, JSON, HTML, CSS, GitHub.

TASK TRACKER REST API (May 2026):

- Built a Task Tracker REST API using Spring Boot that allows users to create, update, delete, and filter tasks by status (pending/completed), persisting data with Spring Data JPA and MySQL.
- Designed clean RESTful endpoint structure following HTTP method conventions (GET, POST, PUT, DELETE) and returned standardized JSON responses with appropriate HTTP status codes.

EDUCATION

- 2021-2025 B.E - Computer Science and Engineering at Knowledge Institute Of Technology (CGPA – 7.4)

CERTIFICATIONS

- Master Program in Full Stack Development Using JAVA - Livewire
- Certification in BIG DATA - NPTEL
- Front End Developer with Grade A+ - Capgemini Student Transformation Program
